Selling Solar just got simpler with Samlex SOLAR + POWER BUNDLES

Burnaby, BC (British Columbia) – November 18th, 2022 – Samlex introduces a new way to sell solar systems. The newly launched RV Solar + Power Bundles are an all-in-one sales tool, designed to simplify the process for RV and Marine dealers to sell an OFF-GRID solar and power system.

With over 30 years in the power conversion industry, Samlex understands the most common challenges and questions that Dealers face when recommending an off-grid power system to their customers. With electrical terms such as watts and amps, and multiple components to consider, it can sometimes be overwhelming for both the dealer and their customer, who just wants to get out and start enjoying their new RV.

Samlex has updated their popular Dealer Success Binder to include the NEW Solar + Power bundles, three predesigned packages to fit the most common RV lifestyles. With a series of easy-to-follow charts, Dealers can help customers select their RV type, power needs, number of people in their group, and the duration of time they'll be away to recommend one of three bundles; **EXPLORE 200W**, **SHARE 400W** or **ENJOY 600W**. Each bundle includes solar panel(s), charge controller, power inverter or inverter/charger, remote control, transfer switch, solar battery maintainer, and all the parts and hardware needed for a straightforward installation.

It's never been so easy for Dealers to help their customers experience the freedom of boondocking, where they can enjoy the sounds of nature, instead of a crowded campsite or the constant hum of a generator. With self-sufficient power your customers can be independent of the grid and have clean, renewable energy for their necessities, anywhere and anytime.
